Top strips: profile along M at W = 45 d (identical for every W). Cross: W = 45 d, M = 5 d.
a
Valid pairs (lag ≤ 0)
b
Origin events matched
c
Mean propagation fraction
d
Median propagation fraction
e
Median lag (d)
f
Mean chain size, $N_c - 1$
Search window W (d)
Minimum overlap M (d)
